MESH Super Care Clinic

MESH has designed and implemented an innovative upstream medical surge management plan in advance of Super Bowl XLVI. The Super Care Clinic is designed to provide primary and urgent care to fans, visitors, and volunteers in Indianapolis for Super Bowl events. For more information contact MESH at (317) 630-7409.

For additional details visit: <http://www.indysupercare.org/>

Pediatric Trauma: New Concepts and Controversies "How I Do It!"

This on-line symposium covering topics such as pediatric trauma and pediatric injuries including blast, burn, reconstruction, thoracic, head, and abdominal injuries is scheduled for February 17, 2012. 6.75 CME credits are available. Register by January 31, 2012 to receive an on-line discount.

For additional details visit: <http://globalcastmd.com/register-for-pediatric-trauma>

Pediatric Button Battery Ingestion

The number of fatal button battery ingestions occurring in young children has dramatically increased within the last two decades. Should parents suspect or witness battery ingestion, the parents should immediately seek medical care. Prompt medical care is critical, as severe damage can occur in as little as two hours. Please see the attached pediatric button battery informational sheet for additional details. Visit: www.poison.org/battery/guideline.asp for a comprehensive medical guide.
